

Tengizi Khunashvili

Product Designer (UX/UI) with AI & No-Code Expertise

Summary

Product Designer (UX/UI) with 4+ years of experience across eCommerce, SaaS, Web3, and mobile products. Focused on conversion-driven design and user behavior analysis, using data insights to identify friction points and improve user journeys.

Contributed to global products, helping increase engagement, retention, and overall performance through scalable, data-informed design. Experienced working on international products across EU markets, collaborating closely with product, development, and stakeholders.

Combines visual design, product thinking, and technical awareness to deliver effective user experiences, while actively using AI tools to speed up workflows and improve design output.

Experience

UX/UI Designer (E-commerce, App)

Geske - German beauty tech

[Geske.com](#) [Geske App](#)

- Led UX/UI improvements across global web and mobile ecosystem, identifying friction points using heatmaps, analytics, and funnel tracking
- Optimized key user journeys and conversion flows, improving engagement and reducing drop-off rates across core flows
- Redesigned personalized "SmartAppGuided" routines, improving alignment with user needs and increasing long-term retention
- Contributed to scalable design systems, ensuring consistency across multiple platforms and markets

2024 - 2026

📍 Germany, Berlin 📍 Georgia, Tbilisi

UX/UI Designer (E-commerce, App)

Satisfyer - German tech

[Satisfyer.com](#) [Satisfyer App](#)

- Contributed to redesign of global e-commerce platform and mobile app, improving overall user experience
- Enhanced conversion flows by optimizing product discovery and engagement within wellness journeys
- Built seamless hardware-app integration, increasing user trust, retention, and product usage consistency

2024 - 2026

📍 Germany, Berlin 📍 Georgia, Tbilisi

UX/UI Designer (SaaS)

Stori AI

[Storai.com](#)

- Redesigned the B2B dashboard, making complex AI workflows easier to understand and use
- Turned prompt-heavy AI logic into guided, step-by-step user flows
- Designed personalized brand generator pages to help users create and manage their visual identity
- Improved the full journey from brand setup to social media content creation
- Enhanced usability and clarity through better structure, hierarchy, and system feedback
- Built a centralized style system to keep generated content consistent and on-brand

2023 - 2024

📍 Georgia, Tbilisi

UX/UI Designer (Web 3)

Nomadao

[Nomadao.net](#)

- Designed core user flows for web and TV app, covering search, booking, and payments
- Simplified crypto-based interactions to make Web3 features easier to understand and use
- Improved onboarding and collaborated with devs to align UX with technical constraints

2022 - 2023

📍 Litva, Riga 📍 Georgia, Tbilisi
